

PRIVACY POLICY

The services of this website, including any software offered (hereinafter referred to as the Software), or IT services, may use cookies or other technologies to collect personal information of users in order to help improve work experience, simplify our interaction or for other purposes.

In many cases, our software will record no personal data, but some of our software products may ask you to authorize the registration of your personal data and use cookies to register this data. We strive to protect the confidentiality of information about our customers and take all necessary and reasonable measures to protect the confidentiality of client information on the Internet.

While no data transfer via the Internet can be 100% protected from intrusion, we continue to use solutions and do our best to protect your confidential information.

We also encourage you to cooperate in order to ensure the security of your confidential information, and we strongly recommend that you or each of your customers necessarily select their passwords carefully so that there is no possibility of unauthorized access by a third party.

In order for the password to be difficult and difficult for others so that they cannot guess, you and your customers should use a combination of letters, numbers and special characters (for example, ! @, #, \$, Etc.).

Each client is obliged not to disclose his password to anyone, to carry with him any written or other records about passwords in such a way that a third person could not access it. With its commitment to not disclose to third parties any information received from customers, if such an action is not necessary.

The Client authorizes us to exchange, share or all information related to personal data, transaction history, affiliated organizations (Banks, Financial Institutions, Credit bureaus, Tax Agencies) by telephone or electronic communication or otherwise, which may require disclosure of your data by law, or in the normal course of practice, for example, for credit reporting, statistical analysis, credit assessment, for inspections or risk management. The foregoing cannot
